Harmony Research Creates Another First! Exclusive!

NEW *Vibra Jet* GUITAR WITH ELECTRONIC TREMOLO

Built In . . . Transistorized . . . Finger Tip Control . . .
Performs With Any Amplifier

Want unusual sound effects in your playing? Would you enjoy "tremolo" at your fingertips, in your guitar, as now obtainable only thru special circuit amplifiers? Then Harmony's Vibra-Jet Tremolo Electric is for you! Enjoy pulsating Tremolo through your guitar, not through your amplifier.

Built into this handsome Neo-Cutaway Double Pickup Electric is a skillfully engineered transistorized and miniaturized assembly (made in America) which, at your command, produces a Tremolo effect through any amplifier.

A lever, in easy reach of your little finger as you play (see illustration), activates Tremolo effect. Adjacent knobs control the speed of the beat, and depth or modulation. Powered by inexpensive battery. The amplifier you play need not have a built-in tremolo.

The built-in double pickups are Golden-Tone Indox, designed in cooperation with De Armond. Each has volume and tone controls. A 3 position switch permits playing through either pickup, or both together, with or without tremolo effect.

Ultra-Thin Neo-Cutaway (modified double cutaway) hollow body. Beautifully polished mahogany shaded finish with sunburst effect.

Harmony's favored Ultra-Slim neck with Torque-Lok reinforcing rod, narrow ebonized bound fingerboard and straight line design provides uniform "feel" throughout all positions.

No. H66 - Vibra-Jet Guitar. Size 15 3/4 x 40 1/2 in.—rim 2 in. deep. \$189.50

No. C70 - Carrying Case, keratol, plush lined. 22.50

\$95.00

NEW! HARMONY'S HI-VALUE ELECTRIC BASS

Golden Tone Pickup, De Armond Built—Bass and Baritone Registers—Outstanding Response

Designed for the guitar player who would like to "double" on a second instrument. Designed, too, for the bass player who would like to shed the back-breaking chore of carrying a massive string-bass from job to job. Designed for all players who seek "different" effects. The value built into it is unsurpassed.

Comfortable Auditorium size—Ultra-Thin hollow Tone Chamber body—laminated maple top and back—celluloid bound edges. Satin-smooth walnut shaded sunburst eggshell finish.

Slim Torque-Lok reinforced neck—straight line for uniform feel—15 frets clear of the body. The ebonized fingerboard is comfortably narrow for easy fingering. 1 3/4 in. wide at the nut. Full scale, 30 inches from nut to adjustable bridge.

The new Golden Tone Bass pickup was especially designed in cooperation with De Armond for dual tone and fine response. Finger tip switch provides a choice of full bass or lighter baritone registers. Separate tone and volume controls. A conveniently located rosewood finger rest facilitates easy plucking of the strings. Size overall 15 3/4 x 44 1/4 in. Rim 2 in. deep.

"We need a bass!" No group can be a success without an electric bass. When your group is ready for the "big beat", ready to build your rhythm, look at a Harmony.

Is it simple for a guitar player to double on a bass. We build them well balanced, easy to handle and finger. There's a choice of solid body, or the more desired hollow body with its extended range.

Harmony electric basses have full scale necks, 30 inches from nut to bridge, with Torque-Lok adjustable reinforcing rods. Fingerboards are comfortably narrow, accurately fretted.

Harmony multi-voiced bass electronics are designed in co-operation with DeArmond, unsurpassed world-wide. Try one for yourself at the music store.

Here are amplifiers of every desirable power, and to fit every budget. Each in its own price class represents the maximum value for the money. And when you hear one of them with your own guitar—or a new Harmony electric guitar—you will realize how well an amplifier can be actually "musically matched" to a guitar. You'll find it worth an early visit to your music store.

Harmony amplifiers are acknowledged to be among the best values in America. Engineering and design and the use of components of the topmost quality, including famous Jensen speakers, assure many years of dependable service and satisfaction. We invite you to make the most rigid comparison at the store.

...AND 12 STRING ELECTRIC GUITAR

No. H79. Harmony's Finest 12 String Electric Guitar — Ultra Thin Hollow Body . . . Double Cutaway . . . De Armond Electronics. The skills of Harmony craftsmen in building the widely acclaimed Harmony 12 string acoustical guitars have been employed to develop this outstanding Electric model. "Slim Line" neck with slotted headpiece design and horizontally mounted machine heads. Can be tuned to regular guitar pitch. Short scale—24 $\frac{1}{4}$ in. length from nut to bridge saddle. Careful workmanship enters into every detail of fingerboard and body, inlays and edge bindings. The finish is in a richly polished burgundy red. Designed in cooperation with De Armond, and fully guaranteed, the advanced dual pickups and 5 controls assure a wealth of choice of musical sounds and effects. Size 15 $\frac{3}{4}$ x 41. Rim 2 in. deep.

No. C79—Carrying Case, keratol, plush lined

NOTE: 12 String guitars have the strings arranged in 6 pairs. Identical strings in the 1st pair (E) and 2nd pair (B) are tuned alike, in unison. The other four pairs (G, D, A, E) consist of strings which are tuned an octave apart. The result is a rich, haunting tone which fascinates listeners.

No. H27. Harmony's Finest Thin Hollow Body Electric Bass. Double Cutaway . . . Double Pickup, De Armond Designed. Styled and electronically equipped to meet highest professional bass tone standards. The Ultra-Thin hollow body with arched top and back is of selected laminated maple, with handsomely polished shaded and highlighted sunburst finish. Has contrasting edge bindings and inlays. Ultra-Slim maple neck is full bass scale, 30 inches from nut to adjustable bridge. Torque-Lok reinforced. Ovalled rosewood fingerboard has bindings and inlays on all edges, and inlaid position markers on top and side. Large chrome plated individual tuning keys, heavy nickel plated covered tailpiece, and precision 6-way adjustable metal bridge for accurate tuning and sustaining power. Twin Golden Tone pickups, designed in cooperation with De Armond, and fully guaranteed, have paired magnetic polepieces under each string to permit more complete responsiveness. Tone and volume controls for each pickup. Lower, upper, or both pickups activated through selector switch, giving a great versatility of bass voicings. Modern flat wound strings, quiet and smooth for fingering comfort. Size 15 $\frac{3}{4}$ x 45 in. Rim 2 inches deep.

No. C27—Carrying Case, keratol, plush lined

No. H22. Hi-Value Electric Bass. Golden Tone Pickup, De Armond Built . . . Bass and Baritone Registers. Comfortable Auditorium size Ultra-Thin hollow Tone Chamber body, flat laminated maple top and back, celluloid bound edges. Satin-smooth walnut shaded eggshell finish. Slim Torque-Lok reinforced neck. 15 frets clear of the body. The rosewood fingerboard is comfortably narrow, 1 $\frac{3}{4}$ in. wide at the nut. Full bass scale, 30 inches from nut to adjustable bridge. Fine quality flat wound strings.

The pickup was especially designed in cooperation with De Armond for dual tone and fine response. Finger tip switch provides a choice of full bass or lighter baritone registers. A rosewood finger rest facilitates plucking of the strings. Size overall 15 $\frac{3}{4}$ x 44 $\frac{1}{4}$ in. Rim 2 in. deep.
